SXG MOWER RANGE

Whether you are mowing your lawn, an estate or numerous contracts the versatile ISEKI SXG range of mowers cut and collect leaving a superior finish.

Designed and engineered in Japan to offer the most reliable, high quality diesel mower on the market for the most demanding of users.

*Some images in this brochure contain prototype machinery

SXG Mower Range

Quick Specifications:

SXG216+

- 13.5hp diesel engine
- 40" width of cut mower deck
- Low tip collector with 320ltr capacity

SXG324

- 19.4hp diesel engine
- 48" width of cut mower deck
- High or low tip collector up to 650ltr capacity

FED UP OF WATCHING AND WAITING FOR THE RAIN TO STOP?

Cutting your lawn can be a laborious task at the best of times.

Take this frustration away with the ISEKI SXG mower. The blowerless straight chute from the deck to the collector means that even when the grass is wet, you can still cut and collect with the same pristine finish.

See why the SXG Range works so well in the wet on Page 10...

SXG327

- 21.6hp diesel engine
- 54" or 48" width of cut mower deck
- High or low tip collector up to 650ltr capacity

THE HANDY HATCH

Once the grass is cut, you can use the hopper to carry all your other garden waste. Instead of pushing a wheelbarrow around, the optional easy to access Handy Hatch can be used to carry your prunings and clippings to the compost heap where it can easily be tipped out, offering an easier alternative.

POWERFUL

Because of it's large capacity, low revving 1123cc engine the SXG324 and SXG327 creates very little vibration and wear and tear on the engine, whilst also being very fuel efficient and powerful up to 21.6hp. The SXG216+ has a powerful 13.5hp, low revving 688cc, 2 cylinder diesel engine ideal for tackling parks and gardens.

COMPACT SIZE

Built to be perfectly balanced, the compact dimensions (2.5-3.3m long) allows the SXG to be incredibly maneuverable, enabling you to effortlessly mow around lawns, flower beds and trees. No extra weights are needed on the front of the machine for stability.

EASY AND COMFORTABLE

Simple to drive, the 2-pedal hydrostatic system allows for the ultimate control so you can quickly change direction and speed whilst mowing with minimal effort. The large operators platform offers maximum comfort with plenty of leg room, ergonomic controls and suspension seat.

HIGHLY ADJUSTABLE DECK

Height of cut on the deck can be changed whilst you are mowing by simply adjusting the dial next to the drivers seat in 8mm increments helping you to easily cut finer lawns and larger, longer cut areas all in one go.

Further adjustability can be made by the clevis pin on the castor wheels of the deck.

Model	Width	Height of Cut
SXG216+	40"	30mm-120mm
SXG324	48"	25mm-115mm
SXG327	48" or 54"	25mm-115mm

HIGH AND LOW TIP COLLECTOR

To help make disposing of grass cuttings easy the SXG324 and SXG327 have an hydraulically operated high or low tip collection system which can lift up to a height of 2.08m.

Built to be perfectly balanced, even when the collector is full and tipping from maximum height, there are no additional weights required.

The SXG216+ comes with a low tip collector operated by the electric, fingertip control, so you don't have to empty the collector manually by tipping it up.

ALSO AVAILABLE AS REAR DISCHARGE CUT AND DROP

Where grass collection is not required the SXG324 is available as a cut and drop machine utilising a 48" shaft drive rear discharge deck. The SXG327 with its extra power is able to accept the 54" rear discharge deck for more productivity as well as the 48" version. Both decks offer cutting heights from 25mm - 115mm and share the easy cutting height adjustment mechanism found on the rest of the range.

The SXG cut and drop models offer smooth diesel power, tight turning circle and robust build quality along with exceptional levels of operator comfort.

ISEKI

Making your life easier

SUSPENSION SEAT AND EXTRA LEG ROOM

SIMPLE HEIGHT OF CUT ADJUSTMENT

HYDRAULIC DECK LIFT AND POWER STEERING

GENEROUS 40" TO 54" WIDTH OF CUT

LARGE CAPACITY COLLECTOR

SUPERIOR COLLECTION SYSTEM

SXG Mower Range - OPERATOR'S PLATFORM

Suspension seat for the ultimate comfort whilst mowing plus extra leg room on the operator's platform. Armrests are an optional extra for added luxury whilst you are working.

ROPS frame (Roll Over Protection Structure) can be folded down to allow easy access into garages or sheds for storage.

Retractable lap belt to help keep you safe whilst driving on the machine.

Front headlights so you can continue to use the mower even when daylight is fading.

Power steering for easy manoeuvrability whilst out cutting making your job easier and more enjoyable. *Manual steering only on SXG216+ model. Steering wheel can also be titled and adjusted to ensure the optimum comfort whilst driving.

Ergonomically positioned hydraulic levers for adjusting the deck and operating the collector on the SXG324 and SXG327 models.

Automotive style dashboard gives clear information whilst operating the mower, plus a fuel gauge to ensure you are never left to accidentally run dry.

The right hand side of the dashboard now incorporates an electronic PTO engagement switch and cruise control. If the PTO is off and the parking brake on, it is possible to exit the operators platform whilst the engine remains running.

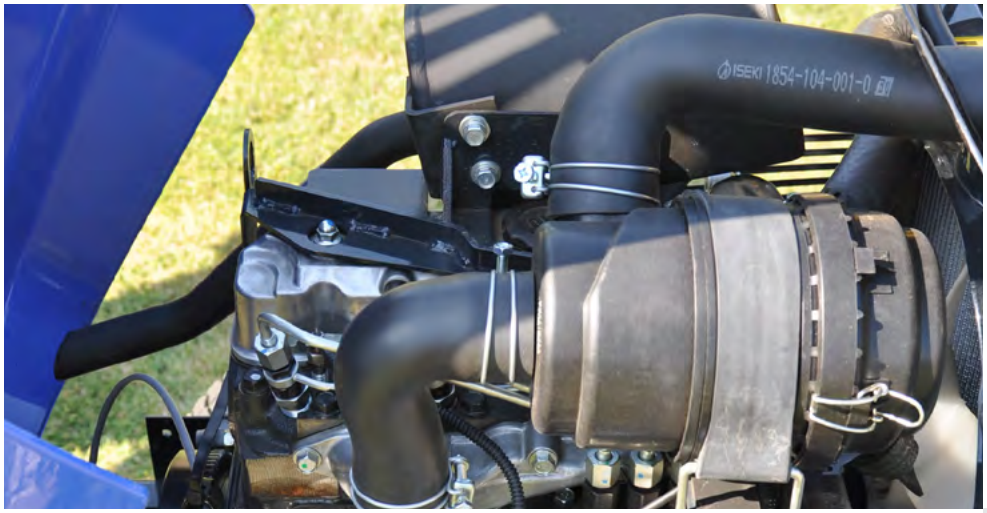

Joy stick control for operating the collector plus a seperate lever for raising and lowering the mower deck. Reverse mow switch enables you to carry on cutting in reverse at the same speed, reducing downtime on turns. It then resets itself when you move forward again.
This means that all controls for the mower deck and collector are within easy reach of the operator's right hand.

Full road homologated lighting kit and separate parking braking system is available to enable you to road register the mower for safe approved use on the roads when travelling to and from sites.
(SXG324 & SXG327 only)

EASY SERVICING AND MAINTENANCE

The powerful diesel engine is easy to access for all the daily checks like the dipstick, radiator cover and water with the wide opening bonnet.

As soon as the grass box is full a sensor on the collector notifies the operator visually on the dashboard and audibly, allowing you to mow as productively as possible only emptying when completely full.

For minimal maintenance requirements on the mower deck, the blades are shaft driven so there are no horizontal belts on top of the decks which can easily falter whilst mowing, thus avoiding undue inconvenience.

HOZELOCK CONNECTOR

on the top of the deck enables you to quickly and easily clean the deck after cutting to help keep it in pristine condition. Simply hook it up to the water and run the deck briefly to clean off all the debris. The SXG216+ has a plain push on connector to wash the deck.

OPTIONAL ACCESSORIES

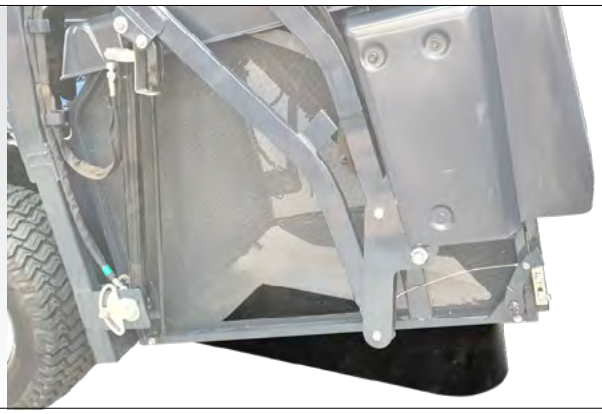

TOW HITCH

Tow hitch is available to enable you to move a trailer around behind the SXG mower, available whether you have a collector fitted or not.
(SXG324 & SXG327 only)

FLIP-UP FLOOR KIT

Flip-up floor kit is a conversion available that allows the collector floor to be lifted, enabling the mower to cut and drop where required and then easily placed back down again for seamless collection.
(SXG324 & SXG327 only)

FRONT HITCH

Front PTO comes as standard where you can also add an optional front hitch to carry a rotary brush or snow blade for clearing debris.

HANDY HATCH

Make your life easier and use the grass box with it's wide easy access lid to tip all your garden waste into, replacing the wheelbarrow and then effortless tip onto your compost area.

Why does the SXG mower range cut and collect so well?

Renowned for its exceptional cut and collect abilities, the SXG mower range has a number of attributes that allow the machine to cut and collect with no blockages and leave a superior finish everytime.

The rear axle is mounted high under the seat out of the way with chain drive to each of the rear wheels, this allows the grass to flow straight through from the deck to the collector with no obstructions to avoid unwanted blockages.

Largest chute in its class allows for maximum movement of grass from the deck to the collector so the productivity is never compromised.

The powerful, up to 21.6hp, diesel engine is capable of working on various terrains for prolonged periods of time without excess wear and tear on the machine.

The vents on the tops of the SXG324/SXG327 decks allow the airflow to be controlled to suit the grass or weather conditions.

If the grass is wet or very long - open up the vents. In dry weather or if collecting dry leaves the vent can be closed.

Book your demonstration today and see why the SXG mower range really is the most reliable, productive and high quality mower on the market.
